

BunkShield™

POWERED BY ORGANIC ACIDS

Advanced Mold Inhibitor for Silage Preservation

BunkShield is an advanced mold inhibitor powered by organic acids to preserve silage quality and protect nutrients. It has been proven that potassium sorbate chemistry controls mold and yeast, reduces spoilage, and extends aerobic stability after opening. Safe, versatile, and easy to apply, BunkShield works on forages, high-moisture corn, haylage, and TMRs without disrupting beneficial lactic acid bacteria. Backed by science and trusted by producers worldwide, it's a clean-label solution to keep feed cooler, fresher, and more nutritious longer.

Key Benefits

SUPERIOR MOLD & YEAST CONTROL

- Inhibits growth of spoilage organisms like molds and yeasts that cause heating and dry matter loss.
- Maintains feed quality during storage at feed-out

HIGHLY EFFECTIVE, PROVEN CHEMISTRY

- Potassium sorbate is a GRAS (Generally Recognized As Safe) preservative used globally in food and feed.
- Targets spoilage without interfering with beneficial lactic acid bacteria.

EXTENDED AEROBIC STABILITY

- Helps silage remain cool and stable for **days longer** after opening.
- Especially valuable for high-moisture silages and TMRs.

PROTECTS NUTRIENT VALUE

- Reduces dry matter losses and preserves digestibility.
- Less spoilage = more nutrients to your herd.

VERSATILE & EASY TO USE

- Suitable for **forages, high-moisture corn, haylage, and TMRs**.
- Can be applied directly or through most applicators.
- Formulated to use with BactiSile silage inoculants and highly effective for use when applied alone.

BunkShield™

POWERED BY ORGANIC ACIDS

Why Choose BunkShield?

- Backed by science and trusted by producers worldwide
- Compatible with bacterial silage inoculants
- Clean label, safe for animals, no withdrawal time

Typical Application Rates *(Always follow label instructions.)*

FORAGE TYPE	APPLICATION RATE	METHOD
Corn Silage	.128 fl oz per treated ton	Applied at chopping
High Moisture Corn	.25 fl. Oz. per treated ton	Apply at roller/ hammer mill or blower for upright storage
Haylage	.128 fl oz. per treated ton	Applied at baling or chopping
TMR	2-4 lbs. per ton	Mixed into ration daily

Product Line

 BactiSile™	110,000 cfu/g with enzyme pack	<ul style="list-style-type: none"> • 1000 ton pouch (800 grams) • 500 ton pouch (400 grams)
 BactiSile™ PLUS	200,000 cfu/g with enzyme pack	<ul style="list-style-type: none"> • 500 ton pouch (600 grams) • 100 ton pouch (200 grams)
 BactiSile™ PRO	150,000 cfu/g	<ul style="list-style-type: none"> • 500 ton pouch (500 grams)
 BunkShield™	Liquid Mold Inhibitor	<ul style="list-style-type: none"> • 500 ton • 1000 ton
